Native

I am 24 years old and have a strong passion for mobile app development. I know important languages such as C++, Dart, HTML, CSS, and JavaScript, and I can effectively use popular frameworks such as Flutter, React Native, and Bootstrap. I share my software projects using GitHub and attach great importance to software architectures. I have worked with different teams on various projects before, and teamwork is crucial for me. Through my GitHub profile, I have shared many projects and have learned the importance of teamwork in these projects. With these experiences, I am eager to take an active role in the mobile app development processes of any business.
